

THE STANDARDS SYMPOSIUM

Beyond Standard Information
& Industry Expert Access:

IPC-1754, IPC-1752 & FMDs

MAY 24, 2018 | CHICAGO

WHY

DOES YOUR COMPLIANCE TEAM NEED TO ATTEND THE STANDARDS SYMPOSIUM?

The Standards Symposium will connect industry leaders with professionals in aerospace and defense, heavy equipment, and other industries for informative, leading edge sessions on the value of leveraging full material disclosures (FMDs) and material declaration standards such as IPC-1752 and IPC-1754.

This comprehensive, one-day conference provides best practices for using standards and FMDs to optimize your compliance program. Presentations and panels on how IPC-175X standards and FMDs can be leveraged through the supply chain will complement information on the new IPC-1754 standard. Attendees will leave

with the knowledge they need to prepare for incoming requests using the new standard from industry leaders, including IPC-1754 development committee co-chair Walter Jager.

The Materials and Substances Declaration for the Aerospace and Defence, and Other Industries standard, known as IPC-1754 provides a standard XML template used to meet various declarable substance list (DSL) requirements.

Developed by a working group of the Association Connecting Electronics Industries (ACEI), it facilitates the logical flow down of requests and data from one tier of the supply chain to the next.

WHAT

WILL YOU LEARN?

The Standards Symposium will educate attendees about the IPC-1754 and IPC-1752 standards and how to best leverage FMDs in compliance programs. Sessions on the new standard will be complemented by presentations and a panel discussion about the synergies that exist between IPC-175X standards and FMDs, and how the comprehensive data captured in FMDs can help companies efficiently meet current and future compliance objectives.

IPC-1754 will bring changes to substance reporting, and suppliers in aerospace and defence, heavy equipment, and other industries must be prepared to respond to requests using this standard. As industries adopt the IPC-1754 standard, understanding how to use it for reporting will be critical to fulfilling contracts and working with customers.

Attendees will learn how FMDs can be leveraged to streamline data collection and meet compliance objectives, and why a mix of IPC-175X standards is needed. Attendees will hear about the approach the medical industry took when first using FMDs, and how that knowledge can carry over to their own compliance departments.

CONFERENCE ATTENDEES WILL LEARN:

- How to stay ahead of customer requests and mitigate potential business continuity risks
- How to implement IPC-1754 and IPC-1752 into compliance programs without disrupting workflows
- Perspectives on the new standard from various tiers of the supply chain
- How to leverage various DSLs to meet industry and regulatory needs
- The value of FMDs and how to leverage disclosures to satisfy compliance objectives

Our team attended a conference hosted by Assent Compliance... to increase our overall knowledge and understanding of certain key regulations. We were very satisfied with the results.

– Holly Baxter
Integrator Parts Coordinator, TMEIC

A COMPREHENSIVE AGENDA

8:30 AM Registration & Breakfast

9:00 AM Welcome & Opening Remarks

9:15 AM Keynote Presentation

Presenter: John Hunter, Heavy Equipment Industry

10:20 AM Presentation: What Is IPC-1754?

Presenter: Walter Jager, ECD Compliance

Hear from the co-chair of the IPC-1754 development committee about the new standard, how it will impact your business and why a standardized approach to substance reporting is so important.

11:10 AM BREAK

11:25 AM Presentation: Leveraging DSLs to Meet Industry & Regulatory Needs

Presenter: Ben Bolt, Boeing

IPC-1754 can be implemented in multiple industries to meet diverse DSL requirements. Understand the process for utilizing the AD-DSL and its benefits within the supply chain.

12:05 PM Presentation: Reporting on Substances in Products With the AD-SRT

Presenter: Ashley Rubinsky, Lockheed Martin Corporation

An introduction to the AD-SRT, with simplified population training and use case examples.

12:40 PM LUNCH

1:40 PM

Presentation: Understanding the Value of FMDs

Presenter: James Calder, Assent Compliance

Full material disclosures can make a difference in your compliance program, but you have to know how to use the data collected. Hear from an expert about the power of FMDs to enhance your product compliance program.

2:30 PM

Panel: The Supplier Perspective — Tier by Tier

Moderator: Mark Swofford, Embraer

Panelist: Joseph Auer, Woodward

Compliance professionals across different tiers of the supply chain offer insight into the value of FMDs, how they see IPC-1754 affecting their industry and how to manage process chemicals in the supply chain.

3:20 PM

BREAK

3:40 PM

Presentation: Evaluating Your Options — Preparing for IPC-1754

Presenter: Rhonda B. Grady, Esterline

Hear from a compliance expert about expected challenges surrounding the adoption of IPC-1754. How can companies prepare for this new standard, what lessons from IPC-1752 can be applied and which best practices can they implement in their own operations?

4:15 PM

Medical Perspective: Lessons Learned Using FMDs

Presenter: Will Janisch, Baxter & Medtech

Hear from an expert in the medical industry about FMD challenges, resourcing your compliance efforts and what the medical industry found during its first try at using FMDs. With the industry's 2020 compliance deadline approaching, a mix of IPC-175X standards is needed to put together a full picture of your products.

4:50 PM

Closing Remarks

6:00 PM

Limo Bus Pick-Up & Dinner

WHO

WILL YOU HEAR FROM?

Attendees will hear from industry leaders, including:

WALTER JAGER

Principal Consultant, ECD Compliance

Walter Jager is a principal consultant of ECD Compliance and serves as a chair of the Canadian committees for IEC/TC 111 (Environmental standardization for electrical/electronic products) and ISO/IEC JTC 1/SC 39 (Sustainability for and by Information Technology). He is also co-chair of the 2-18k Materials and Substances Declaration for the Aerospace and Defense, Heavy Equipment and Other Industries committee, which was responsible for the development of IPC-1754.

JOHN HUNTER

Sustainability Analysis & Compliance Manager, Heavy Equipment Industry

John Hunter was a leader in Caterpillar's chemical management program spearheading the company's response to the REACH Regulation. In 2010, he moved to Caterpillar's Global Headquarters to support the Environmental Health and Safety team before moving back into Product Compliance to implement a conflict minerals compliance program. Today, John is co-chair of the Conformity and Assessment Committee as part of the National Association of Manufacturers (NAM)'s efforts to support U.S. companies, and works across multiple industries to mitigate the impact of global regulations.

RHONDA B. GRADY

Program Director, Ethics & Business Compliance, Esterline Technologies Corporation

Rhonda B. Grady is a member of Esterline's corporate legal team and has developmental and operational responsibility for Esterline's ethics, anti-corruption, human rights, data privacy, supply chain transparency, and E&HS programs, including training and management of the Ethics & Compliance Helpline. She is a Certified Public Accountant and holds both the Compliance & Ethics Professional and Compliance & Ethics Professional - International Certifications.

JOSEPH AUER

Product Material Compliance (PMC) Product Manager, Woodward

Joseph Auer has spent over 45 years in a variety of challenging and complex roles. As a leader in Woodward's Global Supply Chain department, he facilitates the development of material compliance processes, procedures, tools and systems, and provides material compliance regulation interpretation. Prior to Woodward, Joseph ran a sole proprietor program management consulting business for seven years, serving defense program clients.

WILL JANISCH

Vice Chair, Medtech

Sr. Manager, Global Environmental, Compliance, Baxter

Will Janisch is responsible for Baxter's holistic approach to supplier risk, sustainability, performance management and innovation. He has represented the publicly-traded healthcare company at Marcus Evans conferences, where his 2015 presentation at the third Conflict Minerals Conference stood out for its innovative approach to conflict minerals compliance. Will has a long track record of supply chain diligence. Since the enactment of Section 1502 of the Dodd-Frank Act, he has become a trusted source of information on process and implementation of procurement policies with respect to conflict minerals.

JAMES CALDER

VP, Compliance & Regulatory Programs, Assent Compliance

James leads Assent Compliance's Regulatory team, providing clients with expertise and insights into the development, implementation and management of their compliance programs. His career spans over 12 years as a senior expert on product stewardship, regulatory approvals/certifications, product safety and ethical sourcing. Before joining Assent, James spent three years as Rakuten Kobo's Compliance Officer during the company's aggressive global expansion. He also spent seven years managing the regulatory team at Intertek, one of the largest certification, testing and consultancies in the world.

WHAT

IS THE COST?
